AP03-AA4-EV04 DOC Taller Elaboracion Resumenes

Análisis y desarrollo de sistemas de información (Servicio Nacional de Aprendizaje)

_____

Elaboracion de resumen Para la comprencion de textos en ingles

APRENDIZ:

PAULA ANDREA SUAREZ

INSTRUCTOR

ANDRES FELIPE PARRA

TEG. ANALISIS Y DESARROLLO DE SISTEMAS DE INFORMACIÓN

FICHA: 2175866

REGIONAL RISARALDA

Name: Paula Andrea Suarez
Date: 05/03/2021

_____

Taller

Elaboración de résumén Para la compresion de textos en ingles

1. Reading for main ideas

Read the text *Cloud Computing*, available at SENA Library's databases by following the link below. To access the library, just login with your ID number.
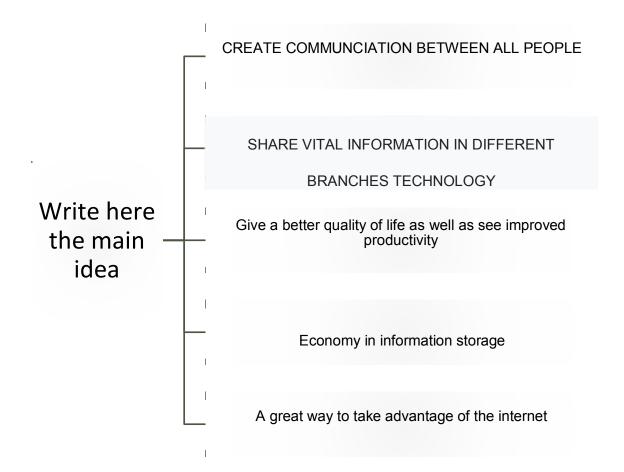

Dziak, M. (2016). Cloud Computing. *Cloud Computing (ELL)*, 1.

http://search.ebscohost.com.bdigital.sena.edu.co/login.aspx?direct=true&db=elr&AN=114488477&site=ell-live

_____

Based on the previous reading, write the required information on the chart below.

Topic: Cloud Computing

Write here the main idea

CREATE COMMUNCIATION BETWEEN ALL PEOPLE

SHARE VITAL INFORMATION IN DIFFERENT

BRANCHES TECHNOLOGY

Give a better quality of life as well as see improved productivity

Economy in information storage

A great way to take advantage of the internet

2. **Writing a summary**

Name: Paula Andrea Suarez
Date: 05/03/2021

_____

Now, use the information related to the main idea you already identified and the supporting details you extracted from the passage, to write a summary of the text *Cloud Computing*. Use the following template to guide your writing process. Remember that supporting details can be used to make key points in your summary.

⇒ **Bibliographic Information**

Author(s) of article**: Dziak, Mark**

Title of article: *Computation en la nube*

Name of magazine, newspaper, website, etc. containing the article: **PCMag Digital Group**

Date article was published and page number: **cloud Computing (ELL), 2016**

⇒ **Summary Information**

Briefly state the main idea or thesis presented in this article:

Cloud computing relates the way of sharing information and programs with other people and once it stores said information on the internet, it is also used as a mechanism to test new programs

Summarize the most important information, ideas, facts, etc. presented in this article:

1. **Computing can be used by companies or by individuals individually**

2. **People can also share information with their friends and family through mobile devices**

3. **Cloud computing can also make work easier. It allows workers to use the best new programs over the Internet**.

_____

4. Users may have problems with Security, or security. They may also have privacy issues. Privacy means not being watched by others

5. Cloud computing was becoming very popular. Millions of people around the world used it at home, at work, and at school.

6. Businesses can also decide to charge more money. Cloud users will have to pay more to get to their information.

7. Many people share public clouds. Hybrid clouds are another option. They are a mix of private and public information.

⇒ **Summary**

Write the final version of your summary here.

Taking into account the importance of cloud computing, we can conclude that it was created by a human need to better manage information and to be able to store documents that cannot be carried by hand like a hard disk because it would be very expensive to carry it and get a place to open it also we can not leave aside that how everything has a problem such as the lack of security in the system is a risk that all people must bear when purchasing cloud computing.

After being known all over the world and having a global impact, it is not worth mentioning the appreciation that has been given to it for the need to have greater security in the system and in a more effective database.

With cloud computing, not only does it give a vision of what is to come in the future, but it also gives us the opportunity to be part of one of the best security tools that has revolutionized our present day
